

## Curriculum Framework – Digital Electronics (2015-2016)

### Unit 3 Sequential Logic – Lesson 3.2 Asynchronous Counters

Desired Results <i>(stage 1)</i>		
<p><b>ESTABLISHED GOALS</b> <i>It is expected that students will...</i></p> <ul style="list-style-type: none"> <li>G1 – Demonstrate an ability to identify, formulate, and solve engineering problems.</li> <li>G2 – Demonstrate an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.</li> <li>G3 – Demonstrate an ability to design and conduct experiments, as well as to analyze and interpret data.</li> <li>G4 – Demonstrate an ability to apply knowledge of mathematics, science, and engineering.</li> <li>G5 – Demonstrate an ability to use the techniques, skills, and modern engineering tools</li> </ul>	Transfer	
	<p><b>TRANSFER:</b> <i>Students will be able to independently use their learning to ...</i></p> <ul style="list-style-type: none"> <li>T1 – Design and implement common types of asynchronous counters used in electronics and recognize where these types of counters might be applied in a digital circuit.</li> <li>T2 – Distinguish between the different levels of integration a designer can use in selecting logic gates for an asynchronous counter.</li> </ul>	
	Meaning	
	<p><b>UNDERSTANDINGS:</b> <i>Students will understand that ...</i></p> <ul style="list-style-type: none"> <li>U1 – Asynchronous counters, also called ripple counters, are characterized by an external signal clocking the first flip-flop. All subsequent flip-flops are clocked by the output of the previous flip-flop.</li> <li>U2 – Asynchronous counters can be implemented using small scale integrated (SSI) and medium scale integrated (MSI) logic gates.</li> <li>U3 – Asynchronous counters can be implemented with either D or J/K flip-flops.</li> <li>U4 – Up counters, down counters, and modulus counters all can be implemented using the asynchronous counter method.</li> </ul>	<p><b>ESSENTIAL QUESTIONS:</b> <i>Students will keep considering ...</i></p> <ul style="list-style-type: none"> <li>Q1 – How can D flip-flops or J/K flip-flops be arranged in order to create a desired asynchronous clock signal?</li> <li>Q2 – How would you use a design process to create asynchronous counters using small scale integration (SSI) and medium scale integration (MSI)?</li> <li>Q3 – Why is it important to have a counter/start at specific values?</li> <li>Q4 – How can an asynchronous counter be designed to start and stop/repeat a count at the desired values?</li> </ul>

Acquisition		
<p>necessary for engineering practice.</p> <ul style="list-style-type: none"> <li>• G6 – Pursue the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.</li> <li>• G7 – Demonstrate an understanding of professional and ethical responsibility.</li> <li>• G8 – Demonstrate an ability to function on multidisciplinary teams.</li> <li>• G9 – Demonstrate an ability to communicate effectively.</li> <li>• G10 – Gain knowledge of contemporary issues.</li> <li>• G11 – Recognize the need for, and develop an ability to engage in life-long learning.</li> </ul>	<p><b>KNOWLEDGE:</b> <i>Students will...</i></p> <ul style="list-style-type: none"> <li>• K1 – Recognize asynchronous counters.U1</li> <li>• K2 – Recognize that asynchronous counters are commonly referred to as ripple counters.U1</li> <li>• K3 – Recognize small scale integration (SSI) logic gates.U2</li> <li>• K4 – Recognize medium scale integration (MSI) logic gates.U2</li> <li>• K5 – Arrange asynchronous counters to count up or down over a specified range.U4</li> </ul>	<p><b>SKILLS:</b> <i>Students will...</i></p> <ul style="list-style-type: none"> <li>• S1 – Describe the advantages and disadvantages of counters designed using the asynchronous counter method.U1</li> <li>• S2 – Describe the ripple effect of an asynchronous counter.U1</li> <li>• S3 – Analyze and design up, down, and modulus asynchronous counters using discrete D and J/K flip-flops.U4</li> <li>• S4 – Analyze and design up, down, and modulus asynchronous counters using medium scale integrated (MSI) circuit counters.U2,U4</li> <li>• S5 – Describe where a count starts and where a count stops/repeats on a modulus asynchronous counter.U4</li> <li>• S6 – Use Circuit Design Software (CDS) and Digital Logic Board (DLB) to simulate and prototype SSI and MSI asynchronous counters.U4</li> </ul>

Evidence (stage 2)		
Activities (A) Projects (P) Problems(B)	Assessment FOR Learning	Assessment OF Learning
3.2.1.A Asynchronous Counters: SSI Up and Down Counters	<ul style="list-style-type: none"> <li>• Student responses to examples in presentation 3.2.1 Asynchronous Counters: SSI Up and Down Counters</li> <li>• Essential Questions</li> </ul>	<ul style="list-style-type: none"> <li>• Print out of simulated circuits</li> <li>• Conclusion Questions.</li> <li>• Demonstration of completed circuit</li> </ul>
3.2.2.A Asynchronous Counters: SSI Mod Counters	<ul style="list-style-type: none"> <li>• Student responses to examples in presentation 3.2.2 Asynchronous Counters: SSI Mod Counters</li> <li>• Essential Questions</li> </ul>	<ul style="list-style-type: none"> <li>• Print out of simulated circuits.</li> <li>• Conclusion Questions.</li> <li>• Demonstration of completed circuit</li> </ul>
3.2.3.A Asynchronous Counters: MSI Suspend and Reset Count	<ul style="list-style-type: none"> <li>• Student responses to examples in 3.2.3 Asynchronous Counters: MSI Suspend and Reset Count</li> <li>• Essential Questions</li> </ul>	<ul style="list-style-type: none"> <li>• Print out of simulated circuits</li> <li>• Conclusion Questions.</li> <li>• Demonstration of completed circuit</li> </ul>
3.2.4.A Asynchronous Counters: Now Serving Display	<ul style="list-style-type: none"> <li>• Essential Questions</li> </ul>	<ul style="list-style-type: none"> <li>• Print out of simulated circuits</li> <li>• Conclusion Questions.</li> <li>• Demonstration of completed circuit</li> </ul>

Learning Plan (stage 3)	
Activities (A) Projects (P) Problems(B)	Knowledge and Skills
3.2.1.A Asynchronous Counters: SSI Up and Down Counters	K1,K2,K3,K5,S1,S2,S3,S6
3.2.2.A Asynchronous Counters: SSI Mod Counters	K1,K2,K3,K5,S1,S2,S3,S5,S6
3.2.3.A Asynchronous Counters: MSI Suspend and Reset Count	K4,K5,S5,S6
3.2.4.A Asynchronous Counters: Now Serving Display	K5,S6
